### **Trinity to Present Supply Chain Management Sessions at Oracle Collaborate 12 Conference**

**Davenport, Iowa (February 7, 2012)**— Trinity, a supply chain solution company, is presenting two workshop sessions on supply chain management at Collaborate 12 Technology and Applications Forum for the Oracle Community held at Mandalay Bay Convention Center, Las Vegas, Nevada on April 22 and 26, 2012. Over 5,000 Oracle Applications and technology users are expected to attend the Collaborate 12 event.

The following sessions will be conducted by Trinity's Erin Cones, Supply Chain Manager; Kristine Murrens, ERP Manager; and Tina Tendall, CIO:

**"Oracle R12 Advanced Supply Chain Planning – Take it to the Next Level"** will demonstrate how Trinity transitioned from an unconstrained plan to a constrained plan that resulted in recommendations for alternate sources of supply based on purchasing lead time constraints. Presenters will explain how Trinity replaced an outside database by utilizing Oracle's robust exception management capabilities to create prioritized work lists using sophisticated workbench queries. Trinity also implemented a personalization to transfer comments when releasing a planned order into a requisition or purchase order.

**"Conquer the Challenge of Publishing Forecasts from Advanced Supply Chain Planning to iSupplier"**, will explain how to use Oracle Supplier Scheduling to provide visibility to planning and shipping schedules within iSupplier and Oracle Supplier Scheduling. The presentation will show how Trinity offers suppliers forecasts based on the plan results from Oracle Advanced Supply Chain Planning. Attendees will learn how to receive increased visibility within a supply base through integrated process from blankets, supplier schedules, approved supplier lists, and iSupplier. Explanation will be given on how to build, revise and simulate planning and shipping schedules and methods to enhance the Oracle Supplier Scheduling process through use of auto-confirm and auto-schedule.

Registration for the Oracle Collaborate 12 Technology and Applications Conference can be made at <http://collaborate.oaug.org/registration/register>.

"At Trinity, we are continually looking for improved ways to do business with our customers and suppliers. With the new configuration of our Oracle Advanced Supply Chain Planning and E-Business Suite, we are able to improve our supply chain visibility, planning, and overall communication with our supply base. In turn, we are able to strengthen our continuity of supply for our customer base.", Erin Cones, Supply Chain Manager, Trinity.

Headquartered in Davenport, Iowa, Trinity has nine locations across North America. Trinity is a leading distributor of industrial fasteners and related supply chain management and logistics services. Trinity also provides a full range of standard and customer-specific fasteners and components through its Trinity Hardware Headquarters catalog distribution service. Additional company information can be found [www.TrinitySCS.com](http://www.TrinitySCS.com). Trinity and Trinity Hardware Headquarters are trade names of the legal entity of Trinity Logistics Corporation.
