Fertilizer Density Scale

Metric and Standard Weights

Part number 2005872

Accurately measures the density of various fertilizer blends by both, pounds per cubic foot and kilograms per cubic meter. Fertilizer Density measurement is extremely important in determining accurate settings of custom application equipment. The proper setting of this equipment insures that optimum yield is achieved without negative environmental impact. Portable, made of chemical-resistant ABS plastic. USDA approved. 15.5" long.

Scoop Scales- Detecto®

The MCS-P Series comes with a large, galvanized 11" x 16" x 5" (28cm x 41cm x 13cm) scoop and chains. These economical dial scales are built for heavy use. The large 8" (20cm) dial is furnished with easy-reading black graduations and numerals on a white background, while the red knife blade pointer indicates weight fast and accurately. The dial mechanisms are protected by the plastic lens, while plastic housing eliminates dents and scratches. All hanging dial scales are available with double dial and/or temperature compensated springs.

Part number 2010622

Scoop: Galvanized 11" x 16" x 5" with chains (28cm x 41cm x 13cm)

Dial: 8" (20cm) dial, with plastic lens
